

## **Senior Information Technology Manager**

### **About the Role**

We are seeking an experienced Information Technology Manager to lead our technology initiatives and drive digital transformation across the organization. The ideal candidate will combine strong technical expertise with business acumen and leadership skills.

### **Key Responsibilities**

- Lead and manage a cross-functional IT team in developing and implementing technology solutions
- Oversee the planning, implementation, and maintenance of enterprise IT systems and infrastructure
- Drive strategic technology initiatives aligned with business objectives
- Manage vendor relationships and technology partnerships
- Ensure system security, data integrity, and business continuity
- Develop and maintain IT policies, procedures, and best practices
- Budget planning and resource allocation for IT projects
- Provide technical leadership in evaluating and implementing new technologies
- Collaborate with stakeholders to identify technology needs and solutions

### **Required Qualifications**

- Bachelor's degree in Computer Science, Information Technology, or related field
- 8+ years of progressive IT management experience
- Strong experience with enterprise systems and infrastructure management
- Proven track record of successful project management and delivery
- Experience with IT security, compliance, and risk management
- Strong knowledge of current technology trends and solutions

### **Technical Skills**

- Enterprise Resource Planning (ERP) systems
- Network infrastructure and security
- Cloud computing platforms and services

- IT service management frameworks
- Database management systems
- System integration and architecture
- Virtualization technologies
- Disaster recovery and business continuity

### **Leadership Skills**

- Team management and development
- Strategic planning and execution
- Strong communication and presentation skills
- Problem-solving and analytical thinking
- Change management
- Budget management
- Stakeholder management
- Cross-functional collaboration

### **Preferred Qualifications**

- Master's degree in related field
- Professional certifications (PMP, ITIL, etc.)
- Experience with digital transformation initiatives
- Knowledge of agile methodologies
- Experience in similar industry

### **What We Offer**

- Competitive salary and benefits package
- Professional development opportunities
- Collaborative work environment
- Opportunity to drive technological innovation
- Work-life balance
- Career advancement potential

The ideal candidate will be a results-driven leader who can balance technical expertise with business strategy, while effectively managing teams and stakeholders across the organization.
